Chiplun, Maharashtra, India • ratneshramane136@gmail.com • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Final-year B.Sc. Information Technology student with practical project experience in Python-based web applications, data analysis and machine learning. Familiar with Python, SQL, Pandas, NumPy, Scikit-learn, Flask and MySQL, with hands-on exposure to data preprocessing, feature engineering, model evaluation and dashboard-oriented application development. Seeking entry-level Data Analyst, Python Developer or Data Science internship opportunities.

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript

Data & Machine Learning: Pandas, NumPy, Scikit-learn, Matplotlib, NLTK; data cleaning, preprocessing, feature extraction, model evaluation

Web & Databases: Flask, HTML, CSS, MySQL, SQLite, SQLAlchemy

Tools: Jupyter Notebook, Google Colab, VS Code, Git, GitHub

PROJECTS

Phishing URL Detection System | Python, Flask, Scikit-learn

GitHub: github.com/Ratnesh-coding/phishing-url-detection

• Developed a web application that classifies URLs as phishing or legitimate using machine-learning models.

• Used a public phishing URL dataset and built a URL-string feature extraction workflow for model training.

• Compared Logistic Regression, Random Forest and Extra Trees using a stratified train/test split and evaluation metrics.

• Implemented a Flask interface and prediction API.

Personal Finance Tracker | Python, Flask, SQLAlchemy, SQLite, Chart.js

GitHub: github.com/Ratnesh-coding/personal-finance-tracker

• Built a web application to record and manage income and expense transactions.

• Implemented transaction CRUD, categories, history filters and monthly budgets.

• Created dashboard summaries and cash-flow and expense-category charts.

Smart Farming Advisory System | Ongoing Academic Project

Planning a simple web-based advisory platform for farmers in collaboration with Ratnasindhu Farmer Producer Company Ltd., Chiplun.
